Accessibility Statement

Harbour Digital Ltd commits to building web applications that meet WCAG 2.1 level AA and, from 2026, WCAG 2.2 level AA, in line with the European Accessibility Act and EN 301 549 v3.2.1 as required for public-sector bodies in Ireland.

How we deliver accessible applications

- Every design system component is tested with keyboard only, NVDA, JAWS and VoiceOver before release.
- Automated checks (axe-core) run in the CI pipeline; a build with a serious or critical violation cannot be released.
- An independent accessibility audit is carried out on each application before go-live, with findings fixed within 20 working days.
- Two of our developers hold IAAP Certified Professional in Web Accessibility (CPWA) status.

Compliance status of our own website

harbourdigital.example is fully compliant with WCAG 2.1 AA as audited in September 2025. Known limitation: embedded third-party video captions are supplied by the provider and are being replaced by captioned originals by Q1 2027.

Feedback and contact

Report an accessibility issue to accessibility@harbourdigital.example. We respond within 5 working days. If you are not satisfied, you may contact the National Disability Authority (Ireland).
